

## **Certification Policy Update Page**

Reference Number: 06-008

The Policy Team will now post certification policy updates on the [JITCNet](#). This new page came about from a Product Enhancement Team finding that many action officers did not know where to find current policy information.

To find up-to-date information, please go to the [JITCNet](#) site and select the “**References**” tab at the top of the page. A list of options will be displayed.

Selecting [DoD POLICY and GUIDANCE](#) will take you to a selection of directives, instructions, and manuals. This site contains most of the interoperability-related guidance that an AO requires. This [particular page](#) is available to the public, so feel free to share it with your customers.

Selecting [JITC TEST & CETIFICATION, JCPAT, PLANS & REPORTS POLICY](#) will take you to a new screen that lists, as the title suggests, updates to published policy. Current policy is detailed in [JITCI 380-50-02](#). This page replaces the Certification Policy folder in OUTLOOK public folder – JITC FHU – COMMAND INFORMATION. To access the updates, simply select the description. If the described update requires you to access another web site, that link is included in the “LINK” column. Information from these pages is intended for the JITC AO/support teams and should not be shared with anyone outside the JITC team.

If you have any questions, concerns, or comments, please contact [Susie Puffer](#) at 538-0471.
